

DIPENDRA NEUPANE

+977-9840071757
neupanedip3@gmail.com

Passionate software developer having above 8 years of working experience in different projects including taxation, automotive, e-commerce, bidding system etc, and comfortable working in different environments - independently, along with the team, and remotely. Seeking to leverage a strong technical role in full-stack software development and also ready for technical leadership as well in

Experience

Lead Software Engineer – 05/2023 - Present

Kathmandu, Nepal

Leading a cross-functional team of **software engineers, designers, and QA** in building and scaling a **bidding system platform**. Oversee sprint planning, unblock development challenges, and ensure timely delivery of sprint-based feature releases. Actively involved in architectural decisions, process improvements, and release management. Technologies used: ASP.NET Core (C#), MS SQL, React, SignalR, AWS Services, and GitHub Actions.

Sr. Software Engineer – 12/2021 - 05/2023

[Vesuvio Labs](#) - Kathmandu, Nepal

Designed and implemented new features, optimized system functionality, and provided ongoing technical support for a **RegTech platform**. Collaborated with cross-functional teams to deliver high-quality solutions and actively mentored junior developers to strengthen team expertise. Technologies used: ASP.NET Core (C#), Angular, MS SQL, and Git.

Sr. Full-Stack Software Engineer - 10/2020 - 12/2021

[AeriTech LLC](#) – Kathmandu, Nepal

Served as a senior member of the software development team, contributing to the development of full-stack solutions and leading the delivery of new features and projects in the **automobile domain**. Played a key role in designing scalable architecture, improving application performance, and setting up automated CI/CD pipelines using GitHub Actions. Technologies used: ASP.NET Core (C#), React.js, MS SQL, and Git.

Sr. Software Engineer - 05/2018 - 10/2020

[CloudyFox Technology](#) – Kathmandu, Nepal

Collaborated with the team and mentored junior developers to deliver new features for sales incentive and loyalty program projects using ASP.NET Core (C#), AngularJS, MSSql, and Git.

Software Engineer - 03/2016 - 05/2018

[Shangrila Microsystems](#) – Kathmandu, Nepal
